

SAMSUNG

Nordic Wind-Free™ Geo

**Intelligent indoor
climate, for the Nordics.**

Introducing the New Samsung Nordic Wind-Free™ Geo

Developed for the Nordic climate, heat or cool your home with the New Samsung Nordic Wind-Free™ Geo 25 and 35. It helps you maintain a comfortable temperature without creating a cold draft. It provides an intelligent indoor climate thanks to smart features that adapt to your personal needs and automatically maintain good conditions. With its new advanced design Samsung Nordic Wind-Free™ Geo has a larger fan, wider inlet and a wider blade. So cool air is dispersed farther and wider*.

Wind-Free™ Cooling

Wind-Free™ technology enhances your indoor comfort by using thousands of micro-holes to disperse fresh air uniformly without any unpleasant blasts of cold wind. In Wind-Free™ mode, air is spread softly and silently, creating a 'Still Air' environment¹ that provides you total well-being day and night.

Low Noise Level

The Nordic Wind-Free™ Geo helps you maintain a comfortable temperature in the home but it is also very quiet while doing so, you will not be interrupted by unnecessary noise. Both models have a low noise level down to 17dB.

AI Auto Comfort

AI Auto Comfort¹ introduces you to an intelligent way of living. To make life simpler and more efficient, it analyses room conditions and usage patterns². Based on your preference and the temperatures outside, it automatically adjusts the temperature to optimise the room's climate conditions, guaranteeing total comfort at all times.

¹ASHRAE (American Society of Heating, Refrigerating, and Air-Conditioning Engineers) defines "Still Air" as air currents at speeds below 0.15m/s which lacks the presence of cold drafts.
²AI = Artificial Intelligence. A Wi-Fi connection and Samsung SmartThings application account are required. ³Stores user data, preferences and usage patterns to suggest the most useful options.

Step 1

The front panel opens, and Fast Cooling mode cools the room quickly from corner to corner.

Step 2

The set temperature is reached in Fast Cooling mode, and the front panel closes.

Step 3

Wind-Free™ mode spreads fresh air uniformly through thousands of micro-holes.

Wi-Fi Control

Temperatures in your home can be managed remotely using the SmartThings App¹. Turning it on and off, selecting the cooling mode, scheduling its operation or monitoring the power consumption is just one touch away. The Bixby 2.0 Artificial Intelligence (AI) system² analyses and predicts your needs so it can suggest the best settings for inside your home.

¹Available on Android and iOS devices. A Wi-Fi connection and Samsung SmartThings account are required. ²Voice control is supported in English (US, UK, Indian), Chinese, Korean, French, German, Italian and Spanish. Portuguese is scheduled to be supported by the end of 2019.

Motion Detect sensor

Motion Detect Sensor effectively cools the home by regulating the air conditioning activity itself. If no movement is detected after 20 minutes, it automatically switches to the energy-saving Wind-Free™ mode but returns to normal mode as soon as activity resumes. It also allows automatic adjustment of the direction of the air flow.

Tri-Care Filter

Keep the air hygienic and maintain the performance of the Heat Exchanger with the Tri-Care Filter. Its three layers include a high-density filter that extracts large household dust particles, fibres and animal hairs. It also has a Zeolite Coating Filter that captures fine dust.

Specifications
